

DAVID COCHRUM

(954) 268-9429 Chrum.me

TL; DR

I specialize in PHP & JavaScript. My mantra is that good is not good enough. I apply this principle to myself just as much as my work since I am never satisfied with the status quo. Through constant, avid exploration of emerging techniques and technologies, I strive to produce the cleanest, most efficient, objective, and reusable code that we can all be proud of.

Collegiate Qualifications

Bachelor of Science: Information Technology (Summa Cum Laude) with a concentration in Web Development from Kaplan University c/o 2011 - kaplan.edu

Companies That Thought I Was Worth Money

Full Stack Engineer (Remote, Contract) @ Etsy

04/2025 to 12/2025

PHP | OpenAPI | REST | MySQL | GitHub

- Assumed co-ownership of Product Level Processing Times feature from OpenAPI perspective and brought it to completion.
- Coordinated across teams to test, document, communicate and deliver the feature along with resolving bugs and providing responses to community questions.

CTO (Remote, Part Time) @ Justice For All National Party

01/2025 to present

Technology Consultant @ Cornel West 2024 Campaign

01/2024 to 11/2024

NodeJS | Postgres | Vue | Adonis | GitLab | Docker

- Advise on and facilitate adoption of all technological tools and issues that arise.
- Built interactive state map to display ballot access progress across the US. Work completed below budget and quite ahead of schedule.
- Created a bot to help fellow moderators of the campaign Slack streamline repetitive tasks.

Back End Software Engineer (Remote, Contract) @ Yahoo

11/2022 to 12/2023

PHP | REST | GraphQL | MySQL | NoSQL | Slim PHP | GitHub | Red Hat Linux | AWS | Docker

- Modernize all aspects of PHP within monolithic application with latest open source standards and practices.
- Delivered latest version of backend API which supported new fantasy league creation.
- Create next generation of API utilizing Slim framework and GraphQL.
- Fix bugs with existing features while increasing test coverage.

DAVID COCHRUM

(954) 268-9429 Chrum.me

Lead Software Engineer (Remote) @ Curio Digital

06/2021 to 05/2023

PHP | REST | MySQL | Redis | CodeIgniter 3 | Bootstrap | Laravel | Shopify | NodeJS
AdonisJS | React | Ethereum | Polygon | Ripple | AWS | Heroku | GitLab | Docker

- Build/maintain CodeIgniter based app including various web3 API integrations.
- Build Laravel based Shopify app to connect with Curio platform.
- Engineer unified NodeJS API for custodial minting on Polygon and Ripple blockchains.

Software Engineer (Remote) @ NinjaCat, Inc.

12/2018 to 05/2021

PHP | REST | MySQL | Redis | Snowflake | Laravel | VueJS | Twilio | Plivo | AWS | Docker

- Maintained multiple projects from monoliths to microservices using Laravel or Lumen on the backend and VueJS or APIs on the frontend.
- Introduced regular code reviews, industry standards and best practices while emphasizing growth of automated test coverage required to pass builds.
- Finished and maintained VOIP microservice handling dynamic routing of hundreds of incoming voice calls per minute via Twilio and Plivo APIs.
- Rebuilt Docker containers used by engineers providing vastly improved daily experience.

Senior Web Developer @ Sonny's Enterprises

05/2015 to 12/2018

PHP | REST | MySQL | Redis | Symfony | Bootstrap | VueJS | NodeJS | RabbitMQ | GitLab

- Worked on complete overhaul of legacy procedural PHP conversion to Symfony OOP/MVC.
- Co-architected and wrote the industry's first cloud served web interface for tunnel hardware (PLC) controller utilizing resilient NodeJS microservices pushing and pulling messages up and down via RabbitMQ.
- Started as junior and moved up to senior while mentoring other junior members.
- Regularly participated in interviewing potential engineering hires.

Senior Web Developer @ Isaac Daniel Group

06/2014 to 05/2015

PHP | REST | MySQL | WordPress | Laravel | SVN

- Solely responsible for maintaining, expanding, debugging, and improving API (extends WordPress XML-RPC) and accompanying documentation utilized by all mobile and desktop apps produced by the group of companies.
- Created my first Laravel MVC/OOP project serving a multi-tenant VOIP SaaS.

IT & Web Admin @ Calvary Chapel Sawgrass

03/2006 to 06/2014

PHP | MySQL | Wordpress | Bootstrap

- Started out with self-taught, hand coded PHP and JavaScript before graduating to WordPress for building and maintaining websites.
- Maintain all the organization's computers, devices, servers, and telecommunications.
