

HISHAM EL FANGARY

Chief Technology Officer

SUMMARY

- CTO with **20 years** in software engineering, product, and UI/UX.
- **8+ years** in engineering leadership, including **1 year as CTO**.
- **10 years building GovTech systems** for governments in MENA, US & Australia.
- Proven in setting technical vision and scaling teams and platforms.
- Strong background in **AWS/Azure, CI/CD**, automated testing, and platform governance.
- Experience integrating and fine-tuning **LLMs** in production.
- Deep expertise in modern web ecosystems and full-stack architecture.
- Strong in stakeholder management, documentation, and SLAs.

SOFT SKILLS

- Lead and mentor high-performing engineering teams.
- Bridge technical and non-technical stakeholders effectively.
- Align engineering execution with product and business goals.
- Resolve team conflicts and foster strong engineering culture.
- Data-driven decision-maker and problem solver.
- Identify risks early and deliver pragmatic solutions.

TECHNICAL SKILLS

- Strong full-stack engineer with a focus on modern, scalable web technologies
- Advanced expertise in **JavaScript, TypeScript, HTML, and CSS**
- Solid backend experience with **SQL and PHP**
- Working knowledge of **C# and Python** for application logic and scripting
- Extensive experience with **React.js, Next.js, Vue.js, Node.js, & Express.js**
- Familiar with **jQuery and Bootstrap** for legacy systems and rapid UI development
- Experience with advanced JS tools and libraries including **ExtJS, GSAP, and Three.js**
- Skilled at building performant, interactive, and maintainable user experiences

EDUCATION

- **Trent University** ON, Canada 2004
Computer Science (Incomplete)
- **Seneca College** ON, Canada 2002
Computer Programming Diploma
- **Centennial College** ON, Canada 1999
Interactive Digital Media Certificate
- **Algonquin College** ON, Canada 1998
CGI & Animation Program (Incomplete)

PROFILE

Chief Technology Officer with 20 years of international experience leading the architecture, delivery, and scaling of complex digital platforms. Proven at defining technical vision, building high-performing engineering organizations, and translating business strategy into secure, scalable, cloud-native and AI-enabled systems. Currently leading technology, product engineering, and DevOps for **bookit**, an AI-powered B2B/B2C booking and marketplace platform. Previously led large-scale platform and CRM transformations at **Astra Tech** and **Accela**, delivering major gains in scalability, customer experience, and delivery speed.

Experience

Bookit July 2025 – Current / Cairo, Egypt
CTO

Key Responsibilities

- Define and own the company's end-to-end technology vision, architecture, & engineering strategy
- Lead product engineering across B2B dashboards, B2C apps, and marketplace experiences
- Design scalable, cloud-native infrastructure & AI-driven systems to support regional growth.
- Oversee DevOps, CI/CD, security, and performance optimization
- Partner with product, design, & business stakeholders to align technology with goals.

Key Achievements

- Architected a modular, scalable platform enabling appointment and class bookings across multiple verticals
- Built a unified marketplace connecting consumers with health & wellness providers
- Established engineering standards, system architecture, and delivery processes from the ground up

Astra Tech (Botim, PayBy, Rizek, CashNow) July 2024 – October 2024 / Dubai, UAE

Engineering Manager / Senior Technical Project manager

Key Responsibilities

- Led a team of Engineering Managers to design the initial architecture for Astra Tech's Ultra Platform
- Managed the initial implementation of a new CRM system for customer service, sales & marketing.
- Analyzed customer service tickets & devised engineering solutions for technical issues

Accela Government Software Jan 2014 – April 2024/ Dubai, UAE
Tech Lead for Frontend

Key Responsibilities

- Led frontend engineering and managed cross-functional teams delivering e-government portals
- Developed full-stack extensions to Accela's core platform for government clients
- Led Agile delivery, sprint planning, stand-ups, client workshops, UATs, and training sessions

Key Achievements

- Modernized customer-facing and internal administration portals with clean, customized UIs, significantly strengthening Accela's competitiveness in the MENA market
- Built highly customized systems including user management, dashboards, search engines, workflow automation, inspection systems, and business rules engines—enabling deep client-specific configurability
- Delivered multiple internal training programs at Accela HQ, with several custom solutions later integrated into the core product
- Successfully turned at-risk projects into renewed contracts by translating client needs into improved user experience and practical, scalable solutions

ImageniusFX July 2008 – January 2014 / Cairo, Egypt
Partner/Head of Multimedia

- Developed & sold fully featured Multi-Touch Sales Kiosks for several major real-estate companies for display at trade shows Programmed VR tours for 3D Visualizations

PetHealth Insurance July 2006 – April 2008 / Oakville, Ontario, Canada
Database Developer & Analyst, .NET Developer

- Developed web applications using .NET & T-SQL for monthly reconciliation & financial reports, & Internal online tools

Wiznet & Wiztel Co. November 2004 - July 2006 / Toronto, Canada
IT Specialist & Software Developer

- Administered Voice Over IP Systems developed in Asterisk and GnuGK, PostgreSQL, linux shell scripts for automation, ASP.NET, & MSSQL
